

What You Eat Affects the Environment

A discussion for climate activists

March 13, 2019
7:00 to 9:00 p.m.

First Unitarian Universalist Church
405 Washington Ave, Albany

Demosthenes Maratos

Dr. Mary Ellen Mallia

Eric Sharer

Animal agriculture:

- *contributes to green house gas emissions equivalent to all transport combined.*
- *uses 1799 gallons of water for each pound of beef.*
- *causes damage to the environment equal to industrial pollution.*
- *causes deforestation, land degradation and wildlife destruction.*
- *contributes to fresh water pollution and ocean dead zones.*

Featuring:

- The Documentary, "Cowspiracy, The Sustainability Secret" (edited version)
- Demosthenes Maratos, Communications Director at the Sustainability Institute at Molloy College, featured in "Cowspiracy".
- Mary Ellen Mallia, Director of Environmental Sustainability at SUNY Albany
- Eric C. Sharer, Registered Dietician and Certified Dietician-Nutritionist will answer questions about nutrition and a plant based diet.
